Social Media Monitoring Report: September 16, 5pm – September 17, 5pm, 2021

Observations principales / Key observations

- Volume: Last 24h: 1.19 k posts/day; Previous 7 days average: 1.62K posts/day; Previous 30 days average: 1.32K posts/day; pre-campaign average: 100 posts/day
- The lack of voting alternatives for COVID positive electors is still a major source of concern and frustration fueled by several news article on the issue.
- There is still a lot of confusion about mask mandates and proof of vaccination related to voting. Additionally, concerns about election day operations based on bad experiences at advance polls are generating discussion and will likely continue to election day.
- New high visibility tweets by US politicians expressing their support to Canadian politicians or parties led to increased accusations of foreign interference, some include accusations of election rigging by the LPC.
- Vote by mail and potentially delayed results are gaining in popularity. Pre-election narratives like dead voters and DVS re-surfaced and gained momentum in the previous 24h.

Misleading narratives on false options for electors with COVID-19

As news articles and online discussions about the lack of options for electors quarantining because of COVID-19 gain traction, many users expressed concerns about vote accessibility. We noticed posts sharing four false options for quarantining electors in the environment. First, the option of a curbside style of voting sometimes called “car ballot”. In this narrative, all polling stations allegedly have special ballot kits ready for electors to vote in their car if they are quarantining. The second, based on users sharing advance polls experience, claims that if requested, ROs can set up outdoor tables for people to cast their ballots. The third claims that EC offers the

option to come to quarantined individuals' home for them to cast their ballot without breaking quarantine. The fourth alleges that a neighbor can bring a quarantined person's ballot to the polling place. Although all these options are non-existent, local election workers should be made aware of what procedure to follow in the event they receive such requests in the upcoming days or on election day.

A day after ex-president Obama tweeted support for a party leader, Hillary Clinton and Bernie Sanders announce who they support in the Canadian federal election, leading to more calls of interference

On September 17, Senator Bernie Sanders and former Secretary of State Hilary Clinton showed support for two different party leaders in very high engagement tweets. A large number of users commented under each of the posts to condemn what they described as illegal foreign interference, inappropriate behavior, or a lack of restraint. The fact that Bernie Sanders is a sitting Senator caused many to question the legality of the statement.

Anti-election post produces high-engagement on Qanon follower and self-proclaimed "Queen of Canada" Romana Didulo's Telegram Channel

On September 16, a user shared a video of 2 VICs with "I AM NOT A BAR CODE" written on them being set on fire and fully burnt on the Telegram Channel of Qanon follower and self-proclaimed Queen of Canada Romana Didulo. The video generated close to 300 comments, most of them claiming the election to be "illegal" or "illegitimate". Other users shared giving their VICs similar treatment as some of them seem to see the VIC as a symbol of tyranny.

Concerns over the integrity of special ballots and EC's announcement that results may be delayed are still popular topics. A journalist's Twitter post casting doubt on the EC integrity in regard to the delayed results from September 15 is still having an impact in the environment as it is still actively discussed (see below, the tweet shared by an Instagram user and generated more than 220 comments). Moreover, extensive coverage of the upcoming election day and articles on the impact of vote by mail on results generated an increase in activity around familiar narratives (three narratives are more prominent: dead voters, LPC using vote by mail to rig the election, and alleged use of DVS machines.) Mentions of the 2020 U.S. Presidential election are currently common. Other posts on this topic express concerns over ballots not arriving in time or electors not receiving their special ballot kit in time, usually sharing frustration or concerns about not being able to vote or alleging the pandemic is an election rigging tactic.

Confusion about EC's stance on mask and vaccination requirements at polling places (or over differences/incoherences between how it is applied across the country depending on local requirements) continues to be a factor in discussions of voting in person, though news about lack of alternatives for COVID positive electors stuck at home has taken the spotlight with a series of news articles on the 16th and 17th of September. Concerns of physical security and spread of COVID-19 at the polls continue to be present in the environment at low levels. Discussions of things that went wrong at the polls during advance polls continue and many assume they will be magnified on election day.

Faits saillants sur les médias sociaux / Social media highlights

Following initial reactions to news that electors who test positive for COVID-19 will have no recourse to vote, deeper discussions of the topic are proliferating on online forums. The major discussion was over whether it was legal for EC to not provide additional measures to vote on election day considering advance polling and requests for voting kits are now closed. Many social media commenters stressed that these additional methods to vote were previously available, and the need to protect public safety overrides an individual who chose to vote on election day and happened to be placed under an isolation order. Other people suggested or erroneously believed other methods of voting to be provided to electors caught in this predicament; many believe EC's stance will force people into voting while infected and not disclosing symptoms.

Le droit de vote est au dessus de beaucoup de lois. Selon moi, c'est matière à poursuites. (No reaction)</p> <p>Reddit user 4 : Imaginons ce que diraient nos médias si la même chose se produisait en Russie... (No reaction)</p> <p>Reddit user 5 : Mon gut feeling me dit que ça va particulièrement affecter les partisans du PPC (No reaction)</p> <p>Reddit user 6 : Asti que c'est glissant comme terrain, baswell. Une autre p'tite graine de plantée - si vous êtes un pas propre, pas le droit de vote. Hmmm.... (No reaction)</p> <p>Reddit user 7 : Pfff Prenez deux tylenol, un DayQuil, pis allez voter. Gardez vos distances, portez le masque. Ça va bien aller. (No reaction)</p> <p>Reply 1 : Si quelqu'un a le covid et fait ça, svp portez un n95 (No r.)</p>	Sept. 17
44	3.1M, Twitter	CBC News, News outlet	<p>The right to vote is enshrined in the Canadian Charter of Rights and Freedoms. But the spread of COVID-19 could force many Canadian voters to isolate at home on election day.</p> <p><i>Canadians isolating due to COVID-19 will be unable to vote on election day</i></p>	Sept. 16

			<p>*Sample comments*</p> <p>Twitter user 1: They could have requested a ballot to vote by mail if they were concerned. (9 reactions)</p> <p>Twitter user 2: A right, not an obligation. Not one of the parties is worth taking 5min out of my day to vote. No matter who wins, the PM will have more vote against him than for him. A country run by a minority...limits the damage but still pathetic. (8 reactions)</p> <p>Reply 1: It is both! (2 reactions)</p> <p>Reply 2: No it's not. Only brainwashed Sheep would believe that. Voting = legitimizing a corrupt system favouring the rich and connected. To think electing someone will change anything is naive at best. They've all been promising change since before I was born, never delivered. (No r.)</p> <p>Twitter user 3: There was a weekend of advance polling and a mail in option. My son voted by mail as he was concerned he wouldn't be able to on the 20th if he was sick. (6 reactions)</p> <p>Twitter user 4: Canada needs e-voting. (5 reactions)</p> <p>Reply 1: While well intentioned, this is a horrible idea. (2 reactions)</p> <p>Twitter user 5: Anyone could have registered to vote by mail, the deadline was Monday. (3 reactions)</p> <p>Twitter user 6: I voted early and I can say that Covid precautions were taken very seriously. You'd be safer voting that's you are grocery shopping. (3 r.)</p> <p>Twitter user 7: Vote by mail (3 reactions)</p> <p>Reply 1: Lol America just went through that theft lesson. (3 reactions)</p> <p>Twitter user 8: If someone tests positive, they shouldn't be permitted to go to a polling station where they could infect others. If anything, this bolsters the argument for voting by mail. (2 reactions)</p> <p>Twitter user 9: Funny thing they said that same thing about the U.S. election last year. Yet it broke records by millions and millions of votes. (1 reaction)</p> <p>Twitter user 10: Can they vote by proxy? (1 reaction)</p> <p>Twitter user 11: What about the fact there were glitches in signing up for mail-in voting? I tagged you a few times about this but never heard back! @CBCNews (1 reaction)</p>
